Portfolio : <https://krish-sharma-portfolio.vercel.app/>

Objective

Software Engineer with experience in AI/ML and backend development, skilled in building scalable APIs, real-time systems, and data-driven applications. Proficient in Python, C++, and Node.js with hands-on experience in ML, RAG systems, and microservices architecture.

Education

GGSIU (USICT) — B.Tech in Computer Science & Engineering

2024–2027 | CGPA: 8.5

G.B. Pant Institute of Technology — Diploma in Electrical Engineering

2021–2024 | CGPA: 9.01

CBSE — Matriculation

2021

Experience

AI Intern — Prodigal AI

Internship · Remote | Jan 2026 – Apr 2026 · 3 months

Developed AI-driven automation solutions and machine learning pipelines as part of a remote internship programme, working on production AI systems and Pc Recommendation System.

AI Research Intern — Cod4Bots Technologies Pvt Ltd(Coding Junior / Planto Ai)

Full-time · Remote | Jun 2025 – Sep 2025 · 3 months

Conducted applied AI research with a focus on Transformers, Generative AI, and large language models in a full-time remote capacity.

CodSoft — AI/ML Intern

Jan 2025 – Feb 2025

Mercedes Benz — Summer Trainee

Feb 2023 – Apr 2023

Delhi Transco Limited — Intern

Jun 2023 – Jul 2023

Skills

Programming & Software Fundamentals

- **Languages:** C, C++, Python, SQL
- **Scripting:** Python, Bash
- **Debugging:** Exception handling, logging, performance profiling
- **Software Design:** API-based architecture, testable code

Machine Learning & Deep Learning

- **Supervised Learning:** Linear Regression, Decision Trees, Random Forest, SVM
- **Unsupervised Learning:** K-Means, Hierarchical Clustering, PCA
- **Deep Learning:** CNNs, RNNs, LSTMs, Transformers, ANNs, GRU, Encoder-Decoder
- **NLP:** Text Classification, Embeddings, Sequence Models, LangChain, RAG
- **Libraries/Frameworks:** Scikit-learn, TensorFlow, Keras, PyTorch

Data Science

- Data cleaning, missing value handling, feature engineering, data visualization, model evaluation (Accuracy, Precision, Recall, F1, ROC-AUC) using NumPy, Pandas, Scikit-learn, Matplotlib, and Seaborn.

Software & Technologies

- **Backend:** Node.js, Express.js, Flask, FastAPI
- **Databases:** MongoDB, PostgreSQL
- **DevOps & Tools:** Docker, CI/CD Pipelines, Linux, Git
- **Authentication & Security:** JWT Authentication, OAuth 2.0
- **Authorization:** Role-Based Access Control (RBAC)
- **Architecture:** REST APIs, Microservices

Generative AI

- **LLMs:** Transformer architecture, attention mechanism, prompt engineering, prompt optimization, GPT, Gemini, Ollama
- **Techniques:** Retrieval-Augmented Generation (RAG), embedding-based retrieval
- **Fine-tuning:** Supervised fine-tuning (SFT), LoRA, PEFT, instruction tuning, dataset curation
- **NLP Tasks:** Text generation, summarization, question answering, information extraction, classification
- **NLP Preprocessing:** Tokenization, lemmatization, stemming, stopwords removal, text normalization
- **Embeddings & Vectorization:** TF-IDF, Bag of Words, Word2Vec, GloVe, sentence embeddings, embedding generation
- **Vector Databases:** FAISS, ChromaDB, Pinecone
- **Similarity & Search:** Cosine similarity, similarity search, relevance ranking
- **Tools & Frameworks:** Hugging Face Transformers, LangChain, Llama.cpp, OpenAI API

Projects

- **AutoPrint Automation System:** Built a scalable automated printing platform using Python, CUPS, Redis, Docker, and Nginx for queue-based remote printing, printer management, and real-time job processing [Link](#).
- **Deepfake Detection System:** Developed a real-time audio and video deepfake detection system using CNN, BiLSTM, and Transformers.
- **Brain Tumor Detection (CNN):** Built a deep learning model with 92% accuracy and integrated nearby hospital recommendations.
- **AI Resume Analyzer & Career Coach:** Designed an LLM-based system using embeddings and cosine similarity for personalized resume feedback and an Interview Coach.
- **PC Recommendation System:** Built an AI-powered system using supervised ML and agents for real-time price-aware PC build recommendations.
- **Fake News Detection System:** Developed an NLP-based classifier with LangGraph agents for real-time news analysis.
- **Bank Churn Prediction:** Applied Classification and Regression ML algorithms for churn prediction.
- **IoT Home Automation:** Built an automation system using NodeMCU.

Certifications & Activities

Certifications:

- IBM AI Engineering Certification
- Microsoft Fundamentals of AI & ML
- Certified Generative AI Professional — Oracle
- Cisco Data Science Essentials with Python

Activities:

- Ranking Under Top 10 At E-Raksha National Level Hackathon At IIT Delhi
- Participated in Innerv Hackathon IGDTUW and reached the Final Round
- Participated in SIH 2025
